

Tailored Advanced Logistics

## Nord Ovest: “tailored” logistics

We all know that every company has its own characteristics and peculiarities based on product types, size and internal procedures. For the last 40 years we have been fine-tuning ad-hoc advanced logistic solutions such as picking, whilst ensuring superior levels of customer satisfaction.

There are always  
excellent reasons for  
choosing Nord Ovest

Logistics  
that work means  
higher levels of competitiveness  
and more profits

- ✔ **We provide comprehensive, highly tailored “turn-key” logistic solutions :** from raw materials to finished products, we are able to provide the space, organisation and skills, in addition to just in time pick-ups and deliveries
- ✔ **We design projects and strategies to improve your performance,** identifying specific material handling solutions tailored to cut critical timing and achieve efficient cost management
- ✔ **All our staff are our own employees** to guarantee maximum reliability and consistent quality
- ✔ **We manage all stock electronically,** with the complete mapping of depots, radiofrequency and software interfaces for data transmission
- ✔ **We provide the possibility to view the stock trends in real time.** thanks to a dedicated reserved access website

Logistically Innovative.

## More warehouses to meet even more demands

Efficient logistics  
means more services for your customers.

We have equipped our services to create an articulated warehousing system to handle all types of merchandise and set ourself the target of meeting all types of requirements customs or duty.  
Thanks to the authorisations granted by the Inland Revenue and the Customs Authorities we can process the requests for all kinds of goods proposed for storage, ensuring a marked savings in terms of timing and costs compared to outsourced and separate management.

Our set-up includes:

- **Customs warehouse:** to store non-EU goods in a withholding tax regime
- **VAT warehouse:** to store EU and non-EU goods in a withholding tax economic regime
- **Duties depot:** for the storage and shipping of goods subject to duties (alcohol, beer, wine etc.)
- **Organic product warehouse:** for organic products that require a separate environment from other types of goods to prevent involuntary contamination; it is constantly monitored to verify the safety and quality levels enforced by the authorities
- **Foodstuff storage depot:** well-aired and dehumidified warehouses, certified to store packaged products for human consumption

## Our work is always fully compliant. It is certified

Our logistic system certifications: **BS OHSAS 18001** (Occupational Health and Safety Assessment Series) for optimal management of the health and safety of workers;  
**ISO 14001** for the environmental management system.

# Nord Ovest proposes a brand new logistic concept

Completely integrated,  
including taxation  
services

We manage shipping and transport services at an international level, a sector in which we have deep-rooted experience and positioning as one of the benchmark enterprises for precision and reliability and superior levels of service customisation.

We have decided to set-up a superior level logistic facility to provide a truly all “inclusive experience”.

Nord Ovest takes on all the legal aspects of transportation, such as custom clearance, storage, delivery of goods and products to end users, solving exceptionally complex and time-consuming organisational problems.

Depalletising, customs and tax formalities, special products, picking:  
**Nord Ovest is there for everything**

Our logistic system includes a complete product management, thanks to the firm’s own state-of-the-art equipped warehouses, authorised as a customs, VAT and duties depot for the storage of foodstuffs and organic products.

Unlike other large shipping companies, we provide prompt global support, and truly exclusive services such as depalletising and picking.

At our warehouse facilities in Cuneo, Mondovi and Grugliasco, easily accessible from all the major road networks, we also manage all the order preparation activities, from importing of large volumes to the packaging of parts and/or packets.
